Go Green with Made In America LED Magnifiers

Fraser, MI, May 13, 2015 - Healthmark Industries has announced the addition of two new optical inspection products, Made In America LED Magnifiers. The 6" round LED magnifier has a 43" reach capability that adjoins to a screw down base, equipped with a standard 4 diopter (2x) lens and produces the highest lumen output in a lighted magnifier.

The 7" x 5 1/4" rectangular LED magnifier has a 43" reach that connects to a table edge clamp. Similar to the round magnifier this model has decreased glare, heat and energy consumption with multi-angle LEDs that make shadows obsolete. Assembled with low voltage (15-24v) power supplies, the magnifier auto shuts off every 4 hours to curb energy loss.

The Made In America LED Magnifiers produce a light output 8-watt LED array that is comparable to a 150-watt halogen. The LED technology produces more light using less energy. Their attractive design and vibrant colors will look good in any department.
